Continuation of Box I.2

Claims Nos.: 31

Present claim 31 lacks clarity (Article 6 PCT). An attempt is made to define the subject-matter, by, reference to the drawings. All the claims... should specify clearly all of the essential features needed to define the invention. Consequently, the search has been carried out for those parts of the claims which appears to be clear, supported and disclosed.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.
